

PRODUCT INFO:

Extended Packs and Companions Available for Canto Cumulus

An overview of the options available for advanced support of popular file formats and productivity applications.

Extended Packs and Companions add powerful capabilities to Cumulus for those using:

- QuarkXPress or InDesign,
- Office application suites by Microsoft, Apple or OpenOffice,
- PDF files created by any application,
- HELIOS file server solutions or the HELIOS ImageServer.

Are Extended Packs and Companions right for you?

Extended Pack and Companion products are Canto Cumulus add-ons that each offer a different set of enhanced capabilities, including:

- Cumulus access from right inside QuarkXPress or InDesign—no Cumulus client required.
- Per-page file handling and metadata management for PDF, PowerPoint, InDesign and QuarkXPress documents—find individual pages and slides, not just complete files.
- On-the-fly creation of PowerPoint presentations based on cataloged images and slides, even over the Web.
- Deconstruct files—track and find which documents contain which assets, and much more.

Add-ons for QuarkXPress.

QXP Extended Pack — This Extended Pack enables Cumulus to create per-page asset records for cataloged QuarkXPress layouts (versions 6.0 and 6.1). Each asset

record can contain its own metadata, which makes it easy to find and track the development of layouts on a per-page basis.

This pack also includes a module that enables Cumulus to take advantage of XPV files created by the HELIOS ImageServer for the purpose of creating high quality, per-page previews of cataloged layouts from within Cumulus.

QXP Companion — This Companion offers direct access to Cumulus catalogs and cataloged assets from inside QuarkXPress. Search catalogs for assets and drag and drop them into layouts. Catalog new layouts into Cumulus without leaving QuarkXPress.

QXP Companion also includes all the functionality of the QXP Extended Pack for Cumulus versions that need it, plus it works with QuarkXPress version 8 layouts.

Add-ons for InDesign.

InDesign Extended Pack — This Extended Pack enables Cumulus to create per-page asset records for cataloged InDesign layouts. As with the QXP Extended Pack,

each asset record can contain its own metadata. Also included is support for HELIOS XPV files for high quality, per-page previews of cataloged layouts from within Cumulus.

InDesign Companion — InDesign Companion works with InDesign version through CS5, and offers InDesign fans the same level functionality and Cumulus integration available to users of QXP Companion.

Add-on for office applications.

Office Extended Pack — For PowerPoint and Keynote users, this Extended Pack splits the slides of presentations into separate asset records, each with its own metadata. What's more, brand new PowerPoint presentations can be created right from within Cumulus, even over the Web—PowerPoint not required!

In addition, the images of iWork and OpenOffice documents can be cataloged into their own asset records, and Outlook email can be cataloged into easy-to-search shared archives that include asset records for attachments.

Add-on for PDF.

PDF Extended Pack — Offering per-page metadata management for PDF files, the PDF Extended Pack also enables users to create entirely new PDF presentations assembled from cataloged PDF pages, even over the Web—Adobe Acrobat not required!

Instantly find a single PDF page in an archive of millions, create per-page metadata, such as citations or

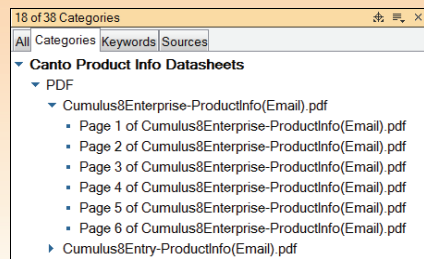

Organize.
Find. Share.
Any File,
Anywhere.

Benefits

1. Leverage the power of other applications from within Cumulus
2. Boost productivity by increasing "self-serve" options for users
3. Take better advantage of your investments in other software
4. Turn Cumulus into a bridge between multiple applications
5. Create new PowerPoint and PDF files—even over the Web!

Features included

- Easy setup and configuration
- Affordable, flat-fee licensing—same low price for 10 or 100 users!
- Add-ons available for all Cumulus editions. (Cumulus Complete includes all products mentioned.)

Automatic categories for easy, instant access

A Cumulus category is automatically created for files cataloged using Extended Packs, so with a double-click, you can instantly see the file, presentation or layout with all images it contains.

You can modify these categories as you would any others, and you can easily turn them off if you don't want Cumulus to create them for you.

references, and more. You can even create individual asset records for the images inside a PDF document, if you need that additional level of granular control.

This add-on is a must-have for any organization whose PDF archive includes PDF files with many pages, such as specifications or user guides—assemble on-the-fly PDFs that include only the information you need.

Add-ons for HELIOS.

HELIOS Extended Pack — Access to the unparalleled capabilities of the HELIOS ImageServer is what this

Extended Pack is all about. **Wrap conversions into simple menu options for Cumulus users** that use the ImageServer for back-end processing.

Support for HELIOS XPV files gives Cumulus the power to **provide per-page previews of your QuarkXPress and InDesign layouts.**

HELIOS Companion — Taking the (included) HELIOS Extended Pack a step further, this Companion **keeps Cumulus catalogs in sync with HELIOS server volumes**—changes made to your HELIOS volumes (new files, moved files, deleted files, renames, etc.) are reflected in your Cumulus catalogs with no additional effort.

More Cumulus enhancement options.

In addition to the Cumulus Extended Packs and Companions, other options are available for enhancing your Cumulus Server too. Contact your Canto representative and ask about:

- Upgrade modules for Cumulus Entry and Workgroup,
- Cumulus Bridge products,
- Canto partner add-on products, and
- Expert training, configuration and customization from Canto Professional Services or the network of Canto Partners worldwide.

Just how easy is this?

Call your Canto rep today, and you could be using the Cumulus Extended Pack you need by tomorrow.

row. There's no additional software to install, because Extended Packs can be activated in any Cumulus Server with nothing more than a license update—no production downtime!

Easy licensing means you pay one price for each Extended Pack or Companion product, no matter how many users are on your network. This makes adding additional user licenses to your Cumulus system much more affordable.

Cumulus Extended Pack and Companion products enhance the capabilities of your Cumulus system, while they boost your productivity—a powerful recipe for increasing your Cumulus ROI.

Some Extended Pack and Companion features are operating system-specific. Consult your Canto representative for compatibility details.

For additional value, ask your Canto representative about special bundle deals that include multiple Extended Packs.

For more information on how Canto Cumulus can benefit your organization, contact your local Canto partner, or contact Canto directly.
